POLYGONAL ST STRUCTURES

The Polygonale structure range offers new and creative solutions to a wide range of sport and event activities.

You can always adapt it to your needs by adding removing elements. It is the ideal solution for multisport activities and all kind of events.

MANUFACTURED BY

STRUCTAS

THE LONG TERM INVESTMENT...

The translucent membrane roofs offer 100% natural lighting, which helps to reduce running costs as well as to create a more comfortable and pleasing environment. Its modularity means that it can be increased or decreased in size over time.

Polygonal is especially used as training facilities for soccer, tennis, handball, volleyball, ice-hockey or basketball.

From design to manufacturing, Structas will supply you with specific requirements and deliver your turnkey building in record time.

STRUCTAS

TECHNICAL DETAILS

Frame

Portals, gable and intermediate frames in high grade light steel S350GD profiles.

Base plates and connection pieces in galvanised steel.
