

STRUCTAS

2021

COMPANY
PROFILE

“You just concentrate to
your core business
we do all the rest.”

Message to our Customers and Partners

Structas Construction founded in 2004 and specializes in design and construction of prefabricated, relocatable buildings and facilities. Since 2004 Stratejim has successfully completed more than 100+ turnkey projects on a total built-up area of hundred thousands square meters.

Structas aims creativity and excellence in all engineering and project management processes. While providing a wide range of services from design, procurement, construction and commissioning to assisting clients in the development of their new investments, Structas offers the best practices in the industry by following the new technologies.

Structas's competitive advantage is based on its high engineering capability, extensive experience, high quality services and outstanding solutions, which made the company a preferred general contractor for many local and international projects.

Projects carried out by Structas Construction are divided into two main operational division as permanent buildings and Relocatable buildings.

Environmental Policy

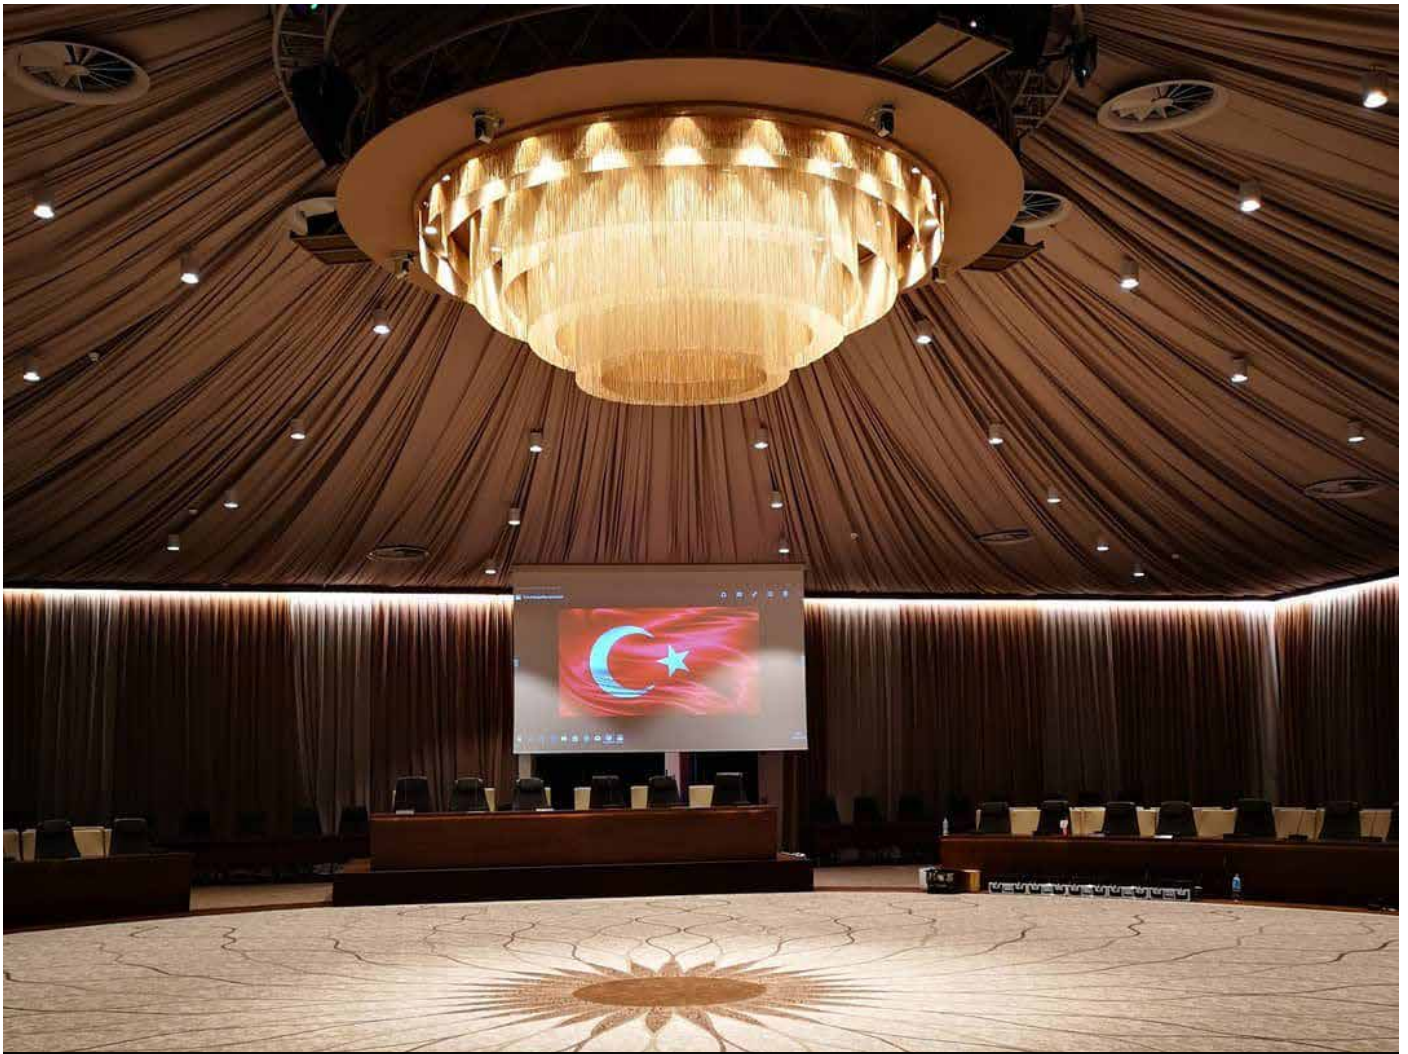

We operate being aware that our life is being more quality and sustainable is connected to the care we bestow to nature and environment today. Making operations conscious of our responsibility to future generations and the world constitute basis of our environmental policy.

Quality Assurance Policy

Quality must be life itself not just a fact. Each operation we realize with this view contains quality at the world standards. In Structas Construction where quality is adopted as an understanding from uppermost to lowermost, action is taken according to common criteria in the sense of community, environment, sector and operations.
